

# REALITY CHECK: ARE YOUR TEEN'S TIRES SAFE?

Of the 2.2 million U.S. accidents each year, nearly 300,000 involve teen drivers and are related to tire issues such as worn treads and over- or under-inflated tires<sup>1</sup>. Teens say they know about tire maintenance, but are they doing anything about it? According to a new survey commissioned by Michelin North America, it's time to move teen drivers from awareness to life-saving action.

## THE SCARY TRUTH ABOUT TEENS AND TIRES

Safety starts where your vehicle touches the road — and U.S. teens are at a disadvantage.

**4 IN 10 TEENS SURVEYED ACROSS 7 MAJOR U.S. CITIES ARE DRIVING ON UNSAFE TIRES.<sup>2</sup>**

**42%**  
with unsafe tire tread depth

**40%**  
with improper tire pressure

## THAT'S A PROBLEM

**12% OF CRASHES** in the U.S. each year involve inexperienced drivers and are related to tire issues

## KNOWING ≠ DOING

Teens say they know about tire maintenance, but their lack of accountability is alarming.

**MOST TEENS (75%) SAY THEY KNOW ABOUT TIRE MAINTENANCE BUT THREE-QUARTERS OF THEM SAY THEY LET OTHERS TAKE RESPONSIBILITY FOR THE MAINTENANCE OF THEIR VEHICLES.<sup>2</sup>**

**Two in five** have never checked their tire tread depth, while **one in three** have never checked tire pressure.<sup>2</sup>

**43%**

**32%**

**YET THEY THINK IT'S IMPORTANT:** Three out of five teen drivers agree they should check their tire pressure (56%) and tire tread (57%) more often.<sup>2</sup>

## TEENS: LET'S SEE YOUR STREET TREAD

Teens care about air pressure and tread depth — but it has more to do with their sneakers than their tires.

To acquire one of the limited-edition Michelin-inspired Vans, teens must prove their street tread by sharing a photo showing that they know how to check a tire's tread depth using a penny and/or know how to check tire pressure.
